

Backstory: given a specific user, find out more about them: where they're from, what things they like/dislike, and other data about their background (think of at least 2 more things to determine). Note that this should be somewhat automated; I should be able to give you a username and you'll produce a backstory dataset for them (it may work better with some users than others). Provide a three sample user backstories in your report, written up as a narrative.

User: CharlesDickensABox

This user cheers for Texas A&M Aggies college football team, we may make a connection that this user is either originally from Texas and/or graduated from Texas A&M.

User likes watching college football. By more comments we know that he is from Texas. (He wrote about going home there and go to the game)

In August 2015 user went to Iowa for travelling. This user likes literature and cinema.

This user visits a lot of subreddits connected with food and alcohol cocktails recipes, and also likes giving advice about cooking, we may make a conclusion, that user likes to cook and prepare drinks.

User works at a place called "Clyde Commons", this user lives in Oregon. This user works as a bartender.

By all the comments and links he posted I may assume that this person's name is Jeffrey Morgenthaler and his website is <https://www.jeffreymorgenthaler.com/>

One more fact: he didn't have any grandparents when he was growing up.

And now it is getting creepy, I think I got enough from this username...

User: TimesAreTough

This user is from California, he is or was a student in University of Southern California, he lives in LA. He cheers for USC Trojans and watches college football a lot.

He is interested in watches, he writes a lot in "Watches" subreddit and discuss different models of watches.

He is majoring in economics or something like this. He is taking accounting and is an excel user.

He likes watching HBO series and anime. He has political opinions against Trump. He likes playing computer and Playstation games, he especially likes League of legends and Mortal Kombat.

User: jaggederest

This user lives in Portland, Oregon. His name is Justin George and he is a programmer, this is his github: <https://github.com/jaggederest>

He contributes a lot in programming subreddit and in some subreddits specialized in languages like Python subreddit. He also likes playing computer games a lot like League of Legends and Starcraft. He has a Nexus 5 phone with Android 4.4 OS in it. He enjoys philosophy books and likes to discuss them and he likes doing sports. It looks like he is a person with wide interests, he likes talking about science, energy, politics and news.
